## Quiz Results

You correctly answered **5 of 5** quiz questions.

### Question 1

<b>Question</b>	Identify one way faculty researchers can possibly avoid undue influence of student subjects?
<b>Your Answer</b>	Avoid recruiting their own students in the research
<b>Result</b>	<b>Correct</b>
<b>Comment</b>	By recruiting students from other classes, faculty researchers can minimize the potential of undue influence. Students from the faculty's own classroom may feel coerced to participate.

### Question 2

<b>Question</b>	Which of the following studies would need IRB approval?
<b>Your Answer</b>	Studies collecting identifiable information about living individuals.

**Result****Correct****Comment**

If a study intends to collect identifiable or information about a living individual, you would need IRB review and approval.

## Question 3

**Question**

Under the U.S. Department of Health and Human Services (HHS) and U.S. Food and Drug Administration (FDA) regulations, what is the Institutional Review Board (IRB) charged with? Select all that apply.

**Your Answers**

- Protecting the rights and welfare of human subjects.
- Assuring that researchers follow all applicable institutional policies and federal regulations related to research with human subjects.
- Reviewing subject recruitment materials and strategies.

**Result****Correct****Comment**

Under the U.S. Department of Health and Human Services (HHS) and U.S. Food and Drug Administration (FDA) regulations, the IRB is charged with protecting the rights and welfare of human subjects and reviewing and overseeing human subjects research. IRBs do not investigate scientific misconduct nor do they review manuscripts prior to submission for publication.

## Question 4

**Question**

A student plans on interviewing 15 principals in neighboring high schools. The student plans to collect data about the personal experiences the principals have had with disruptive students, including the types of disciplinary actions that were taken (including decisions they may have personally made) and their feelings or thoughts regarding whether those actions were appropriate. The research data collected could have an impact on the principals' careers. The student will collect identifiers. This study would be subject to which type of review?

**Your Answer**

Convened Review

**Result****Correct****Comment**

This study would qualify for convened review because the IRB must conduct a careful analysis. The study involves an interview where the data collected could have an impact on the principals' careers and it contains subject identifiers.

## Question 5

**Question**

Which type of IRB review does not require an IRB approval but does require a determination by an individual designated with that task (such as an IRB member or experienced staff person)?

**Your Answer**

Exempt

**Result****Correct****Comment**

Exempt research is human subjects research that is "exempt" from the Common Rule provisions. Per federal guidance, the recommendation is that researchers should not be able to self-determine whether a study qualifies for exemption. Institutional policy should clearly designate who is responsible for making exemption determinations – and it could be an IRB member or experienced staff person with knowledge of the exemption categories and the research activity. Expedited and convened reviews both require IRB approval.

**You scored 100% on the quiz.**
